

Full Stack Dev at FoodMarble

Overview

We are looking for a smart, adaptable and hard-working developer. This is a pretty unique opportunity, so please read on.

- You will experience and contribute to the success of an Irish health-tech scale-up with transformative, global potential.
- You will be central to the implementation of a wide variety of software systems, with a focus on web-based systems.
- You will apply technologies including React.js, Node.js, HTML, CSS, JavaScript, PostgreSQL, Python, Amazon AWS and whatever is required to best meet our current objectives.
- We will guide and support you, providing opportunities to become a better developer and teammate.

About FoodMarble

FoodMarble is a high-growth digital health startup based in Dublin, Ireland. We've developed an app-connected breath analysis device called AIRE to help people overcome incredibly common but radically underserved digestive problems, such as IBS and SIBO. So far, we've sold almost 50,000 devices in over 50 countries, mostly through foodmarble.com and have developed a separate offering for doctors, with a particular focus on the US healthcare. We are a team of 32, spanning engineers, scientists, sales & marketing, finance, and administration.

About You

- You must possess a **growth mind-set**. You must be ready and able to learn from the team and elsewhere to continuously develop yourself and your craft.
- You must be an organised, action-oriented, self-starter who is able and willing to learn fast and be adaptable and **complete projects on-time**.
- You also have to be an effective listener and be able to accurately and **communicate with confidence through English**.
- **Required technical skills:**
 - React.js & Node.js
 - SQL databases (ideally PostgreSQL)
 - HTML, CSS & JavaScript
- **Beneficial technical skills:**

- Amazon Web Services
- Linux command-line (we use Ubuntu)
- Python
- We know that to build a code base that can stand the test of time, accuracy, good documentation and most importantly **clear, expressive code is a necessity**. You must be able to deliver this.
- In return, we guarantee a **respectful and motivating environment**. We will ensure that you have the tools and resources to get the job done and we will **recognise effective work with generous compensation** and the opportunity (indeed, the expectation) of career progression.
- You must be confident with modern workplace tools. We use quite a variety, including Slack, Asana, OneNote, Dropbox, Zoom and of course MS Office. We don't expect you to have used all of these, but comfort with desktop and cloud tools is essential.

Benefits

These include:

- Competitive salary
- Training opportunities
- Flexible working hours
- Great company culture
